20a. How does the Committee accomplish its purpose?

The TIP Advisory Board will accomplish its purpose through providing the TIP Director with advice on programs, plans and policies of TIP; reviews TIP's efforts to accelerate R&D of challenging, high-risk, high-reward technologies in areas of critical national need; reports on the general health of the program and its effectiveness, and provides guidance on appropriate investment areas. The TIP Advisory Board provides an annual report to Congress.

20b. How does the Committee balance its membership?

By statute, the TIP Advisory Board consists of 10 members, at least 7 of which shall be from United States industry. None may be Federal employees. The 7 industrial members are chosen to reflect the wide diversity of technical disciplines represented in TIP projects.

20c. How frequent and relevant are the Committee Meetings?

Beginning with the Consolidated and Further Continuing Appropriations Act, 2012, which was the 2012 Appropriations Bill for NIST, funding was discontinued for the Technology Innovation Program (TIP) resulting in all of its operations including the TIP Advisory Board to be terminated by September 30, 2012. This committee is now administratively inactive until or unless future funding is provided.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

TIP was created to assist U.S. businesses, institutions of higher education and other organizations to support, promote and accelerate innovation through high-risk, high-reward research in areas of critical national need. Because the TIP Advisory Board is comprised of thought leaders from industry and other organizations, such as institutions of higher education, the Board offers a unique perspective on TIP programs, plans and policies.

20e. Why is it necessary to close and/or partially closed committee meetings?

The TIP Advisory Board will advise TIP and NIST on its programs, plans and policies. As such, the Board is briefed at its meetings on budget and budget planning, and this may occur before the President's budget is released. Portions of the meetings may therefore be closed for these discussions in accordance with Section 552(b)(9)(B) of Title 5, United States Code, on the basis that they are likely to divulge matters that may significantly frustrate implementation of proposed actions.

21. Remarks

From #9, Agency Recommendation for Next FY: Discontinue. Lack of Program funding.

Designated Federal Officer

Robert Sienkiewicz Acting Deputy Director, Technology Innovation Program

Narrative Description

The National Institute of Standards and Technology (NIST) is the premier federal laboratory supporting the measurements and standards requirements of the nation. As an agency of the Department of Commerce, the research efforts at NIST are targeted at providing the technological measurement infrastructure that enables innovation and supports industrial competitiveness. As such, NIST maintains research programs and expertise in a broad range of scientific and engineering disciplines. High-risk research in these disciplines helps NIST prepare for the next generation of technologies and their related measurement and standards challenges. The TIP mission is to support innovation through funding high-risk, high reward research in areas of critical national need, and to do so by addressing ...critical national needs with the National Institute of Standards and Technology's areas of technical competence. (U.S.C. 271 Sec.28(l)(2)(B)). The TIP Advisory Board will support these goals by fulfilling its stated purpose of reviewing TIP's efforts to accelerate R&D of high-risk, challenging technologies in areas of critical national need and reporting on TIP's effectiveness in meeting its legislatively mandated mission.
